Sondex Achieve WaterMark Certification

*Sondex Australia are proud to announce full
WaterMark Certification, AS 3498*

Proudly, Sondex Australia now has an extensive range of plate heat exchangers that comply with the requirements of the Australian WaterMark code. We have catered for existing and future guidelines as set out by the AS 3498 WaterMark Certification Scheme.

As specified in AS 3498:

- Sondex Australia holds ISO 9001 Certification
- All materials in contact with potable drinking water are certified to AS/NZS 4020
- Plates are double-wall as required by “Safe Failure” Clause 6.3
- Sondex “WaterMark” plate heat exchangers can be dismantled for internal inspection of the appliances integrity, a key safety requirement being reviewed by Australian Standards

“The future of your building’s WaterMark integrity and ongoing compliance is assured with Sondex potable plate heat exchangers – engineering into the future”
